Unlock the Power of Data SCIENCE Lead the Future

ABOUT NIDADS

NIDADS was founded with a strong vision to empower individuals in the digital era by creating highly skilled data professionals and future-ready analysts. With a deep commitment to quality education, NIDADS delivers practical, industry-oriented learning that prepares students for real-world challenges in Data Analytics, Data Science, and emerging technologies.

At NIDADS, every learner is treated like family. We understand the value of time, effort, and hard-earned money, which is why our focus is always on practical, result-driven training. Our programs are designed to build confidence, create strong portfolios, and prepare learners for successful careers in high-growth tech roles. Over the years, NIDADS has successfully trained and guided thousands of students through both online and offline learning formats.

Our student community is diverse and inclusive, including:

- 25% Freshers (Class 12th & Graduates)
- 30% Business Owners & Working Professionals
- 30% Career Beginners & Skill Switchers
- 15% Learners from Other Career Backgrounds

This diverse learning environment encourages collaboration, idea-sharing, and real-world exposure.

NIDADS is recognized for its high-quality training standards and industry-aligned curriculum. Our programs offer hands-on projects, internships, career mentorship, and 100% placement support, along with certifications aligned with Digital India and Skill India initiatives. With high learner satisfaction and strong industry connections, NIDADS continues to be a trusted name in Data Analytics and Data Science education.

25000+ : Trusted Students

30+ : AI Tools

Dr. Gulshan Kumar
Founder
NIDADS

“Most Promising Brand” IN DATA ANALYTICS TRAINING

MISSION

At NIDADS, our mission is to empower individuals with advanced Data Science expertise, equipping them with the skills to analyze complex data, develop intelligent models, and drive innovation. We aim to bridge the gap between technical education and industry applications by offering expert-led training, hands-on projects, and real-world AI solutions. Through continuous learning and practical application, we prepare professionals to harness machine learning, deep learning, and data-driven decision-making, enabling them to make a significant impact in the evolving digital economy.

VISION

NIDADS envisions a future where Data Science and AI empower individuals to become analytical thinkers, problem solvers, and technology innovators. Our goal is to democratize AI education by delivering high-quality, practical training that aligns with industry demands. We strive to create experts who can leverage data science methodologies, automate processes, and develop AI-driven strategies to reshape industries. By fostering a culture of mentorship, research, and applied learning, we ensure that every learner gains financial independence, career growth, and the ability to pioneer AI-driven advancements. Our vision is to be a global leader in Data Science and AI education, shaping the next generation of professionals ready to transform the digital landscape.

OUR PARTNERS COMPANIES

The logo for Tata Consultancy Services (TCS), featuring the letters 'tcs' in a stylized, lowercase font with a color gradient from orange to purple.The logo for CERTN (Handling Computer Security Incidents), featuring the word 'certn' in blue lowercase letters followed by a blue circular icon with a network-like pattern.The logo for Talent Worx, featuring a stylized 'TV' icon in purple and blue above the text 'Talent Worx' in a sans-serif font.

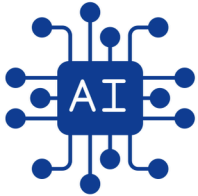

IBM Security

The logo for HCL, featuring the letters 'HCL' in a bold, blue, sans-serif font.The logo for Accenture, featuring the word 'accenture' in a lowercase sans-serif font with a small purple chevron above the 't'.The logo for APRAVA ENERGY, featuring the word 'APRAVA' in a bold, sans-serif font with colorful diagonal lines, and 'ENERGY' in a smaller font below it.

Deloitte.

The logo for Gartner, featuring the word 'Gartner' in a bold, blue, sans-serif font.The logo for Coforge, featuring the word 'Coforge' in a bold, sans-serif font with 'Co' in orange and 'forge' in blue.The logo for Wipro, featuring the word 'wipro' in a lowercase sans-serif font with a colorful circular pattern of dots above it.The logo for assystem, featuring a stylized red 'a' and 's' followed by the word 'assystem' in a lowercase sans-serif font.The logo for VENATOR, featuring the word 'VENATOR' in a bold, blue, sans-serif font.The logo for airtel business, featuring a red circular icon with a white dot inside, followed by the word 'airtel' in red and 'business' in a smaller font below it.The logo for LENEX, featuring the word 'LENEX' in a bold, blue, sans-serif font with 'LEARN INNOVATE EXCEL' in a smaller font below it.The logo for TECHCLOVER, featuring a stylized green 'o' and 't' icon above the word 'TECHCLOVER' in a bold, sans-serif font.The logo for gridlines, featuring the word 'gridlines' in a lowercase sans-serif font with 'grid' in black and 'lines' in teal.The logo for PHOENIX CYBER, featuring the word 'PHOENIX' in a bold, orange, sans-serif font with a stylized bird icon, and 'CYBER' in a smaller font below it.The logo for birlasoft, featuring the word 'birlasoft' in a lowercase sans-serif font with 'birla' in black and 'soft' in red.The logo for Netrix GLOBAL, featuring a stylized blue 'N' icon followed by the word 'Netrix' in a bold, sans-serif font and 'GLOBAL' in a smaller font below it.The logo for paloalto NETWORKS, featuring a stylized orange icon followed by the word 'paloalto' in a bold, sans-serif font and 'NETWORKS' in a smaller font below it.The logo for nippondata, featuring the word 'nippondata' in a lowercase sans-serif font with a small orange icon at the end.The logo for MarshMcLennan, featuring a stylized blue icon above the text 'MarshMcLennan' in a sans-serif font.The logo for Multipli, featuring a stylized purple icon followed by the word 'Multipli' in a lowercase sans-serif font.

AWARDS

Indian Iconic Award By
India's 1st Women IPS Officer Kiran Bedi

Bharat Business Award By Ashneer Grover For India's Most Recommended Skill Based Institute

WHO IS THIS PROGRAM FOR?

Professionals

DizitalAdda is India's most recommended skill based institute, offering expert training in data analytics and artificial intelligence.

Business Owner

DizitalAdda provides data analytics skills to help business owners grow their brands online, enhance visibility, and boost sales.

Students

A perfect opportunity for students to gain industry-relevant skills, making them job-ready and future-proofing their careers.

Career Switchers

Transition into a rewarding data analytics career with practical knowledge, hands-on training, and expert mentorship at DizitalAdda.

Freelancers

Unlock new income opportunities by mastering data analytics skills to attract clients, grow your personal brand, and work independently.

Start-Ups

Empower your startup with data analytics expertise to scale your business, enhance online presence, and generate more leads effectively.

COURSES

WE TRAIN

Course 1 : Diploma In Data Science And AI

Duration : 12 Months

Structure :

- Master data analysis, visualization, and statistical modeling using Python, SQL, and machine learning tools.
- Includes hands-on projects in real-world datasets, predictive analytics, and data-driven decision making.

Course 2 : Advanced Certification In Data Science And AI

Duration : 6 Months

Structure :

- Dive into deep learning, neural networks, NLP, and AI model deployment with Python and TensorFlow.
- Gain practical skills by building smart AI systems for automation, prediction, and language understanding.

Course 3 : Natural Language Processing Professional

Duration : 4 Months

Structure :

- Learn Text Processing, Tokenization, Word Embeddings, and advanced NLP models like RNN, LSTM, and Transformers.
- Build real-world NLP applications such as Chatbots, Sentiment Analysis, and Text Summarization with model deployment.

DDS&AI – DIPLOMA IN DATA SCIENCE AND AI

12 MONTHS COURSE

MONTH 1: FOUNDATIONS & SETUP

Week 1: Welcome to Data Science World

Introduction to Data Science - Definition, Scope, and Applications
Complete Roadmap to Master Data Science
Career Opportunities: Data Scientist, Data Analyst,
ML Engineer, Business Analyst
Understanding the Data Science Workflow (CRISP-DM Methodology)
Real-world Data Science Success Stories

Interactive Quiz Session

Data Science Around Us" - Identifying DS applications in daily life
Netflix recommendations, Google search, Uber pricing, Amazon suggestions
Social media algorithms, weather forecasting, medical diagnosis

Week 2: Essential Tools & Environment Setup

Essential Software and Tools for Data Science
Programming Languages Comparison: Python vs SQL
Why only Python programming used in Data Science
IDE Ecosystem: Anaconda, Jupyter, VS Code, Colab

Practical Implementation

Anaconda Installation & Setup
Jupyter Notebook Understanding
VS Code Setup for Data Science

Cloud Alternative: Google Colab

Complete Colab tutorial for resource-constrained systems

Mounting Google Drive

GPU/TPU utilization

Collaboration features

Week 3: GitHub Foundation

Introduction to Version Control Systems

Git vs GitHub: Understanding the Difference

GitHub Interface and Navigation

Repository Management and Best Practices

GitHub Pages and Documentation

Practical Implementation

Creating and setting up GitHub account

Repository creation and management

README.md writing and documentation

Issue tracking and project management

Forking and pull request workflows

GitHub Pages portfolio creation

Week 4: Excel Foundation

Excel Interface and Navigation

Data Entry and Formatting Techniques

Essential Formulas and Functions

Data Analysis Tools (Pivot Tables, Charts)

Data Validation and Error Handling

Automation with Basic Macros

Data Import/Export and File Management

Practical Implementation

Project 1: Business Data Dashboard

Data cleaning and organization

Formula implementation (SUM, AVERAGE, VLOOKUP, IF statements)

Creating dynamic charts and graphs

Building interactive pivot tables

Designing professional reports

MONTH 2: PYTHON FOR DATA SCIENCE

Week 5–6: Data Structures & NumPy

Python Data Structures: Lists, Tuples, Dictionaries, Sets

NumPy Fundamentals

Array Operations and Broadcasting

Mathematical Functions and Linear Algebra

Practical Implementation

Project 2: Student Grade Analysis System

Data structure implementation

Statistical calculations using NumPy

Grade distribution analysis

Performance metrics calculation

Week 7–8: Pandas Foundation

Pandas DataFrames and Series

Data Loading from Various Sources

Data Cleaning and Preprocessing

Grouping, Merging, and Reshaping Data

MONTH 3: DATA VISUALIZATION & EXPLORATORY DATA ANALYSIS

Week 9–10: Visualization Foundations

Principles of Effective Data Visualization

Matplotlib Fundamentals

Seaborn for Statistical Plots

Choosing Right Chart Types

Practical Implementation

Project 4: Sales Performance Visualization Suite

Multi-dimensional data visualization

Interactive dashboards

Executive summary reports

Week 11–12: Advanced Visualization & EDA

Plotly for Interactive Visualizations

Geographical Data Visualization

Exploratory Data Analysis Techniques

Major Project

Project 5: E-commerce Customer Behavior Analysis

Complete EDA workflow

Customer segmentation visualization

Business insights generation

Presentation-ready dashboards

MONTH 4: STATISTICS & PROBABILITY

Week 13–14: Descriptive Statistics

Measures of Central Tendency and Dispersion
Probability Distributions
Correlation and Covariance
Hypothesis Testing Fundamentals

Week 15–16: Inferential Statistics

Confidence Intervals
t-tests, ANOVA, Chi-square Tests
Bayesian Statistics Introduction
A/B Testing Methodology

Major Project

Project 6: Marketing Campaign Effectiveness Analysis
Statistical significance testing
Campaign performance metrics
ROI analysis and recommendations

MONTH 5: DATABASE & SQL

Week 17–18: SQL Fundamentals

Database Design Principles
SQL Syntax and Operations
Joins, Subqueries, and Window Functions
Database Optimization Techniques

Week 19–20: Advanced SQL

Window Functions & Analytical Aggregations
Query Optimization & Engineering
SubQuery in SQL
Stored Procedure & Triggers

Major Project

Project 7: Retail Inventory Management System

Database design and implementation

Complex query optimization

Real-time data processing

Performance analytics dashboard

MONTH 6: MACHINE LEARNING FUNDAMENTALS

Week 21–22: ML Foundations

Introduction to Machine Learning

Types of ML: Supervised, Unsupervised, Reinforcement

Train-Test Split and Cross-Validation

Model Evaluation Metrics

Week 23–24: Supervised Learning

Linear and Logistic Regression

Decision Trees and Random Forest

Support Vector Machines

k-Nearest Neighbors

Major Project

Project 8: Prediction Model

Feature engineering

Model selection and tuning

Performance optimization

Deployment pipeline

MONTH 7: ADVANCED MACHINE LEARNING

Week 25–26: Unsupervised Learning

- K-Means and Hierarchical Clustering
- Principal Component Analysis (PCA)
- Association Rule Mining
- Anomaly Detection

Week 27–28: Ensemble Methods & Model Optimization

- Bagging and Boosting
- XGBoost and LightGBM
- Hyperparameter Tuning
- Feature Selection Techniques

Major Project

- Project 9: Customer Segmentation & Recommendation System
- Clustering implementation
- Recommendation algorithms
- Business strategy development

MONTH 8: DEEP LEARNING & NEURAL NETWORKS

Week 29–30: Neural Network Fundamentals

- Perceptrons and Multi-layer Networks
- Backpropagation Algorithm
- Activation Functions and Optimizers
- TensorFlow and Keras Introduction

Week 31–32: Deep Learning Applications

Convolutional Neural Networks (CNN)
Recurrent Neural Networks (RNN/LSTM)
Transfer Learning
Model Deployment Strategies

Major Project

Project 10 : Image Classification & Sentiment Analysis
CNN for image recognition
RNN for text analysis
Model comparison and optimization

MONTH 9: BIG DATA & CLOUD COMPUTING

Week 33–34: Big Data Fundamentals

Introduction to Big Data: Volume, Velocity, Variety, Veracity
Distributed Computing Concepts
PySpark Fundamentals: RDDs, DataFrames, and Datasets
Data Partitioning and Optimization Strategies

Hands-on Activities

Setting up Spark Environment (Local and Cluster)
RDD Operations and Transformations
DataFrame API for Data Manipulation
Performance Tuning and Memory Management

Week 35–36: Cloud Platforms & MLOps Introduction

Cloud Computing Fundamentals (AWS, GCP, Azure)

Infrastructure as a Service (IaaS) vs Platform as a Service (PaaS)

Container Technology: Docker Fundamentals

Introduction to Kubernetes for ML Workloads

MLOps Principles and Best Practices

Model Versioning and Experiment Tracking

Practical Implementation

Docker container creation for ML models

Cloud instance setup and configuration

Model deployment on cloud platforms

Cost optimization strategies

Major Project

Project 12 : Scalable ML Pipeline on Cloud End-to-end

ML pipeline development Automated model training and evaluation

Cloud-based model deployment

Monitoring and alerting systems

Cost analysis and optimization

MONTH 10: MODEL DEPLOYMENT & PRODUCTION SYSTEMS

Week 37–38: Model Deployment Strategies

Model Deployment Lifecycle

RESTful APIs with Flask and FastAPI

Model Serialization: Pickle, Joblib, ONNX

Containerization for Production

Load Balancing and Scaling Strategies

API Documentation and Testing

Technical Implementation

Flask API Development for ML Models
FastAPI for High-Performance APIs
Docker containerization best practices
API security and authentication
Rate limiting and error handling

Hands-on Projects

API Development Workshop
Building RESTful ML APIs
Request/response handling
Input validation and error management
API documentation with Swagger/OpenAPI

Week 39-40: Production Monitoring & Maintenance

Model Performance Monitoring
Data Drift and Model Decay Detection
A/B Testing for Model Evaluation
Continuous Integration/Continuous Deployment (CI/CD)
Model Retraining Strategies
Production Troubleshooting

Develops Integration:

Git workflows for ML projects
Automated testing for ML pipelines
GitHub Actions for CI/CD
Model registry and version control
Rollback and disaster recovery

Major Project

Project 13: Production-Ready ML System

Complete MLOps pipeline implementation

Automated model deployment

Real-time monitoring dashboard

A/B testing framework

Performance optimization and scaling

Documentation and maintenance procedures

MONTH 11: ADVANCED SPECIALIZATIONS & CAPSTONE PROJECT

Week 41-42: Advanced Machine Learning & AI

Ensemble Learning Advanced Techniques

AutoML and Neural Architecture Search

Federated Learning

Explainable AI (XAI) and Model Interpretability

Reinforcement Learning Fundamentals

Specialized Projects

AutoML pipeline development

Explainable AI dashboard

Reinforcement learning game agent

Week 43-44: Capstone Project Development

Project Requirements

Industry-Relevant Problem: Address real-world business challenge

End-to-End Solution: Complete data pipeline from collection to deployment

Advanced Techniques: Incorporate latest ML/AI methodologies

Production Ready: Scalable, monitored, and maintainable system

Business Impact: Quantifiable value proposition

Capstone Project Options: (Choose Any One)

Project Requirements

Option 1: E-commerce Recommendation Engine

Option 2: Financial Risk Management Platform

Option 3: Supply Chain Optimization System

Week 43: Project Planning & Setup

Problem definition and scope

Data collection and exploration

Technology stack selection

Project timeline and milestones

Week 44: Implementation & Testing

Model development and training

System architecture implementation

Testing and validation

Performance optimization

Documentation preparation

MONTH 12: CAREER PREPARATION & PLACEMENT

Week 45: Portfolio & Resume Building

GitHub Portfolio Optimization

Project documentation

Code quality improvement

README file creation

Contribution graph enhancement

Resume Development

- Technical skills highlighting
- Project descriptions
- Achievement quantification
- ATS-friendly formatting

LinkedIn Profile Enhancement

- Professional summary
- Skills endorsements
- Project showcasing
- Network building

Week 46: Interview Preparation—Technical Coding Challenges

- Data structures and algorithms
- Python programming problems
- SQL query optimization
- Time complexity analysis

Technical Concepts

- ML algorithms explanation
- Statistics and probability
- System design basics
- Case study analysis

Practice Sessions

- Daily coding challenges
- Mock technical interviews
- Whiteboard problem solving
- Code review sessions

Week 47: Interview Preparation—Comprehensive Aptitude & Logical Reasoning

Quantitative aptitude

Logical reasoning

Data interpretation

Pattern recognition

Behavioral Interview Preparation

STAR method training

Common HR questions

Salary negotiation

Company research techniques

Mock Interview Sessions

Complete interview simulation

Feedback and improvement

Communication skills development

Confidence building

Week 48: Placement Preparation & Career Launch Industry Networking

Job portal registration

Company application strategy

Referral network building

Alumni connections

Personality Development

Communication skills

Professional etiquette

Presentation skills

Leadership qualities

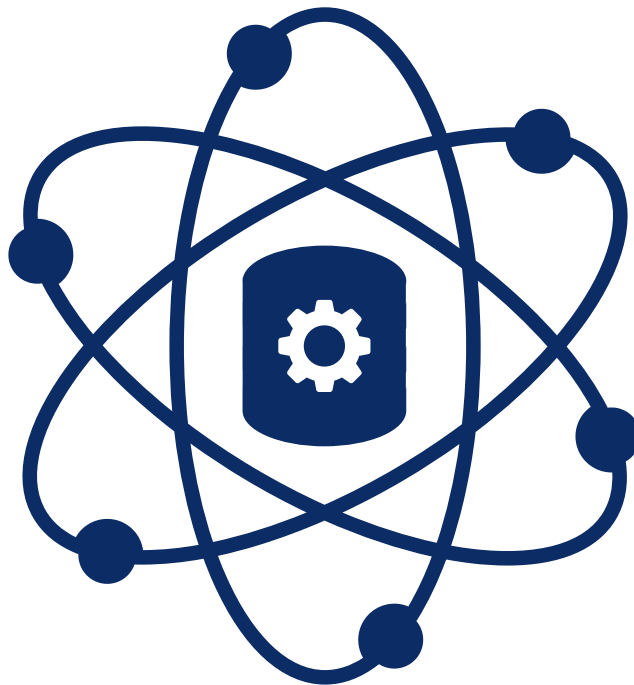

Course Completion

Final project presentation

Certification ceremony

Career counseling session

Ongoing support program

MASTER AI TOOLS FOR THE FUTURE OF WORK

In today's rapidly changing world, our program equips you with the practical skills you need to succeed. We go beyond theory, diving deep into the latest AI tools that are transforming industries. Learn to leverage this powerful technology and gain a competitive edge in the job market.

Unlocking AI's Potential with Data Analytics

Data Analytics is the foundation of intelligent decision-making. By transforming raw data into meaningful insights, organizations can predict trends, optimize performance, improve customer experiences, and make smarter business decisions.

Learn how AI and Data Analytics work together to drive innovation, automate processes, and create impactful solutions across industries such as healthcare, finance, marketing, e-commerce, and technology.

WHAT OUR STUDENTS SAY

NIDADS offers top-notch Data Science training with expert corporate trainers. Highly recommended.

Great institute with top-quality education, practical exposure, and expert trainers. Loved the experience.

Best institute for AI Quality education, real-world training, and a great corporate vibe.

Corporate-level training with advanced tools and real projects. Best place to master Data Science.

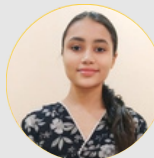

The trainers at NIDADS are industry experts. The corporate-style learning is a game-changer.

NIDADS bridges the gap between theory and practice. The corporate learning style is outstanding.

NIDADS provides excellent hands-on training with live projects. Perfect for career growth.

I got hands-on experience with AI. Best place to start a Data Science career.

The corporate environment at NIDADS makes learning Data Science feel like real industry work.

NIDADS provides a real corporate feel with interactive sessions and live projects. Highly recommended.

Best place to learn AI. Corporate trainers provide deep insights into real-world strategies.

Perfect learning experience! Industry-focused curriculum, expert trainers, and great mentorship.

NIDADS structured course and practical learning helped me land my first AI job.

Best decision to join NIDADS! Quality training, corporate atmosphere, and real-world case studies.

DIZITALADDA TESTIMONIALS

STUDENT REVIEWS

Jyoti Prajapati
3 reviews

★★★★★ 7 months ago

If you've just completed your 12th and are confused about what to do next, go for this AI course. It covers everything – Data Science, Python, Machine Learning, and AI tools – all in detail and in a beginner-friendly way.

Farman Khan
3 reviews · 1 photo

★★★★★ 3 weeks ago **NEW**

The best part is the classes are never boring. They use interactive teaching and even offer career guidance and placement prep sessions. It's not just learning; it's career shaping.

Adil Khan
2 reviews · 3 photos

★★★★★ 7 months ago

I used to think Data Science With AI was only for coding experts. DizitalAdda proved me wrong! The course is so beginner-friendly with great assignments and proper mentorship. I never thought I'd enjoy learning Data Science AI this much.

Kumkum Sharma
2 reviews

★★★★★ a week ago **NEW**

Coming from a small town, I didn't have access to quality resources. DizitalAdda's online + offline support gave me a chance to learn AI from scratch and actually build a future. Can't thank them enough!

Ashok Gupta
1 review

★★★★★ 3 weeks ago **NEW**

When I joined DizitalAdda, I had zero experience with Data Science. But the way they teach — step-by-step with real examples — made everything click. I actually built my first AI model last month. So proud of this journey!
